

**ABSTRACT**

The present invention provides a portable type editing apparatus (1) that includes a main body (10) of substantially rectangular shape, a cover (30) having a main surface (31) of substantially the same shape as that of a main surface (11) of the main body (10), and a coupling portion (40) for pivotably coupling the main body (10) and the cover (30). The main body (10) is provided with memory card slots (15, 16) into which memory cards (2A, 2B) are inserted, and the cover (30) is provided with a liquid crystal display panel (35) on which an A image (36A) and a B image (36B), which are to be edited, are displayed. The center of the main surface (11) of the main body (10) is provided with a rotational operation unit (21) that can slide along the longitudinal direction of the main body (10), and either of the memory cards (2A, 2B) is selected to change subject to be edited by sliding the rotational operation unit (21).
